London, Foston and Chicago Were Fr e Sellers of Stocks-Ersume of the Day's Proce dincs.

Execial to the Gazette.

New York, Aug. 27 .- The New York Central strike has apparently ceased to be a factor in Wall street since the United Order of Railway Employes dealined to join issues with the Knights of Labor. The situation at the Chicago stockyards, however, caused some un-easiness, as it was feared that trouble of Early rumors of further strikes, which proved to be unfounded, had some effect upon early trading, especially upon stocks held on narrow margins. London also had some selling orders in at the opening, and traders were inclined to sell moderately. The sharp advance of yesterday naturally induced some realizing of profits on stock bought at recent low prices. The opening of the market

more serious proportions might develop. consequently was barely steady, and fractional declines were soon recorded. Transactions, however, were on a more limited scale than during the same period | The Stock Market was Dull, Heavier yesterday. After early depression, prices generally recovered to about opening figures, and in some cases above. Union Pacific was especially strong and active. One firm was reported to have bought 5000 shares. London, Boston and Chicago houses were the principal sellers of stock. Su-

gar trusts were depressed 116 per cent. at opening, but later more than recovered the loss on the advance in refined sugar of all grades of 1-16c. Among the specialties, Pittsburg and Western preferred sold up to 39 against 34 last Thursday. Trading continued very duil and rather featureless until after o'clock, when traders made drive at prices and succeeded in forcing them to a somewhat lower level on strike rumors. The market continued weaker during the balance of the afternoon. The lowest prices of the day being recorded in the last two hours of business, the closing figures were nearly all below last night's figures, but in some cases a small recovery from lowest prices. There was an abundant supply of call money at 3@6 per cent. Sterling exchange weaker, posted rates were reduced 50 in several cases. · SHORT OF CAPITAL.

The American Cotton Seed Oil Company Short of Forming Capital-Its Proposed Scheme to Raise it-

NEW YORK, Aug. 27 .- The statement is made to the effect that the American cotton seed oil company is short of forming capital, and that it is now proposed to issue \$5,000,000 debenture bonds bearing 8 per cent, interest, of \$4,000,000 Will be offered to stockholders at par, the proceeds of such issue to form a basis of a working capital fund. The company, it is proposed, may redeem these debentures at \$110, and no mortgage can be placed, it is proposed, without consent of 60 per cent, of these debenture bondholders. The company now has \$4,000,000 preferred stock, but that is not available now, because it cannot be issued at less than par. General details of the plan for the proposed new issue are in the hands of Winslow, Lauier & Co., who have charge of the scheme, and it is said that the entire amount offered to the stockholders will be underwritten before a call is issued for subscription. The old as well as the new cotton oil company was embarrassed by this lack of working capital, and the object of this new issue is to overcome this annual impediment to business in connection with the proposed financiering of the company. Important changes will, it is said, be made in the management. It is further stated that the resignations of a majority of the present trustees have already been ten-dered, and several of them will be accepted in order to make places for wellknown capitalists, who became largely interested in the enterprise. Hereafter the finances of the company will be managed by a finance committee, of which Ed Adams will be chairman.

FOREIGN VISITORS

They Speak a Strange Tongue and Can't Tell Why They Come or Their Destination-Special to the Gazette.

NEW YORK, Aug. 27 .- Emigran t Commissioner Weber was badly in need this morning of someone who could speak the Hindostan language. In his office were respectable-looking Hindoos with gold-laced fezes and wearing the garb of Indian merchants. They arrived from Calcut a on the steamer Richmond Hill, and cannot speak or understand any language spoken on this side of the Gaugest The only intelligible word they uttered was "Calcutta." They have money and several packages of merchandise, and look like well-to-do merchants. No one can ascertain where they want to go to, and Col. Weber has half a dozen messengers out trying to find someone who speaks their language. They have no papers and no documents of any kind to indicate their destination.

Manchester Trade Review.

MANCHESTER, ENG., Aug. 27 .- The Guardian in its commercial article say, the collapse in prices of cotton has almost stopped business. Despite the effect of such sudden and severe drop in the minds of foreign buyers and consum-ers, manufacturers are determined to maintain prices of goods which did not advance correspondingly with the rise in cotton during 1889. Business in yarns was meagre, spinners having the help of | the time.

depleted stocks and stoppages caused by the bolidays are striving to maintain prices. The little business offering renders their success doubtful. Cloth is fairly steady; better makes of China shirtings strong; long shirtings for China and India neglected; other Indian fabries quiet: better grades printing cloths moderately well sold, and prices steady; common grades weakened.

Mrs. Michael Curtain, Plainfield, Ill., makes the statement that she caught cold, which sottled on her lungs; she was treated for a month by her family physician, out grew worse. He told her she was a hopeless victim of consumption, and that no menicine could cure her. Her druggist suggested Dr. King's New Discovery for Consumption; she bought a bottle, and to her delight found herself benefited from first doss. New York, Aug. 7.—The stock market to-day was again dull, although there was some activity in spots, but prices after opening losses of from 1/4 to 3/6 per cent., were moved up and down within narrow limits in everything except a half dozen 'eading stocks, in which there is ill remained a speculative animation. Of these Reading and Lackawanna were conspituous for weakness and Union Pacific for strength. OKLAHOMA CITY, O. T., Aug. 26 .-Pete Washington, the famous Shawnee Indian desperado and leader of a band of horse thieves, came into the city this morning and surrendered to the authorities. He said he was afraid of his life, as five deputies were watching his house. This will virtually break up the horse thieving which for so long has menaced and barassed this region. The Cooper brothers of Edmond. charged with the murder of Louis

Markets Unchanged-Daily Review.

FORT WORTH, TEX., Aug. 27, 1971. Trade good, improving steadily. Retailers did well to-day; also wholesale merchants did a good business. September orders continue ar_ riving.

In reviewing the general markets there is nothing specially to note, only that the markets are fairly supplied in produce of all kinds, which finds ready sale. Some of the commission men are somewhat overstocked in fruit-cabbage, etc., just at present, and in some in stances the quality is not of the best, while there is adequate supply of choice stuff, hence the accumulation of the inferior. Cotton is ar-riving more rapidly now, and buyers are on the slert to capture it,

Louisiana Rice.

The following communication to a New Or leans journal is given for what it is worth on the subject of the Louisians rice crop: The demand for rice does not seem to be nearly so active as it ought to be. So far as we can judge from the market reports of our Northern contemporaries, prices at this point are on a parity with imported styles. Louisiana is first in the with imported styles. Louisiana is first in the market with its crop and ought to be selling frely, while our good friends on the Atlantic coast are waiting for theirs to mature. We believe that the sluggish movement may in part, or altogether, be accounted for by the following from one of the prominent Northern merchants: "Everybody is waiting for the advent of Carolina rice. The trade do not like Louisiana. This is not owing to any prejudice because of locality, but purely and entirely owing to the fact that they cannot get medium grades therein. Millers in the Southwest have a practice of "separaing," by which their outturn is either too good or too poor, and this compels the majority of merchants to combine these two extremes in order to get the desired grade. In cither too good or foo poor, and this compels the majority of merchanis to combine these two extremes in order to get the desired grade. In Carolina they present their output in normal condition, or, as it might be said, devote themselves especially to the making of "line rice." The two forms of milling give an outcome which might be described, to-wit: Louisians, principally, low fair and choice grades; Carolina, good and prime grades. The medium styles, i. e. good and prime, are always more sought after, and exceptional lots during the season afford all needed supplies of fair and fancy sorts." There is certainly something wrong when with our people ready to sell, the Northern importer can market, as they are doing at present, from 200 to 300 bags of foreign rice daily. May it got be that by "separating" an overabundant supply of both of the styles above referred to is made, when, if combined, they would find ready sale.
